

**Gregory A. Poland, M.D.**

Dr. Poland is Professor of Medicine, Molecular Pharmacology and Experimental Therapeutics, Infectious Diseases, Director, Mayo Vaccine Research Group, Director Program on Translational Immunovirology and Biodefense, and Associate Chair for Research, Department of Medicine, Mayo Clinic and Foundation. Dr. Poland is Board Certified by the American Board of Internal Medicine.

His research interests include pediatric and adult vaccines, vaccine delivery and public policy, immunogenetic influences on vaccine responsiveness, and vaccines against agents of bioterrorism. Dr. Poland previously served on the AFEB and was the genesis behind the AFEB report "Vaccine Policy and Practice: A DoD Wide Evaluation." He has innumerable academic and scientific awards and most recently has been awarded the Department of Medicine Distinguished Service Award, Mayo Clinic and the American College of Physicians Mastership Award. He has published over 225 articles in the peer reviewed medical literature, and given over 440 invited presentations.

His extensive background in immunology and vaccine development and utilization will contribute greatly to the Board's ability to provide recommendations to DoD on these important health issues.
